WATER VENDING MACHINES

One Tap Manual Water Vending Machine (Table Design)

Table design water vending machine for refilling already purified water. and for Compact ideal shops, kiosks, and retail refill stations.

1 Manual Tap | Table Design | Compact Footprint

KES 65,000.00 ~~KES 70,000.00~~

WhatsApp: 0790 825 018

WATER VENDING MACHINES

One Tap Automatic Water Vending Machine (Cabinet Design)

Upright cabinet design with automated digital control and keypad for refilling already purified water accurately.

1 Automatic Tap | Cabinet Design | Digital Keypad

KES 75,000.00 ~~KES 90,000.00~~

WhatsApp: 0790 825 018

WATER VENDING MACHINES

Two Taps (Automatic) Water Vending Machine

Dual-tap automatic water vending machine with twin digital micro-controllers for refilling already purified water at higher customer traffic.

2 Automatic Taps | Twin Digital Controllers | Stainless Steel Enclosure

KES 110,000.00 ~~KES 125,000.00~~

WhatsApp: 0790 825 018

WATER VENDING MACHINES

Water Refilling with a 300Ltrs Holding Tank (Automatic 2 Taps)

Water refilling station equipped with a 300-litre stainless steel overhead tank holding and 2 automatic taps for already purified water.

300L Holding Tank | 2 Automatic Taps | Gravity / Pump Flow

KES 125,000.00 ~~KES 130,000.00~~

WhatsApp: 0790 825 018

WATER VENDING MACHINES

Two Taps (Automatic) Water Vending Machine with Rinser

Two taps automatic water vending setup featuring an integrated side bottle for rinser sink refilling already purified water hygienically.

2 Automatic Taps | Bottle Rinser Sink | Digital Price/Volume Metering

KES 105,000.00 ~~KES 115,000.00~~

WhatsApp: 0790 825 018

WATER VENDING MACHINES

Water Vending Machine with 500 Liters Holding Tank (Manual)

Heavy-duty manual water vending station fitted with a 500-litre stainless tank storage and bottle washing station for high-capacity refilling.

500L Storage Tank | Manual Dispensing Taps | Bottle Rinser Attached

KES 130,000.00 ~~KES 140,000.00~~

WhatsApp: 0790 825 018

WATER VENDING MACHINES

One Tap Automatic Water Vending Machine (Table Design)

Compact table design with swan-neck tap and digital keypad for automated of dispensing purified drinking water.

1 Automatic Tap | Tabletop Setup | Digital PLC Keypad

KES 75,000.00 ~~KES 80,000.00~~

WhatsApp: 0790 825 018

COMMERCIAL REFILL STATION GUIDE

- High Return on Investment: Commercial water refilling generates stable daily cash flow with low operational overhead.
- Dual Micro-Controllers: Multi-tap machines allow simultaneous flow dispensing without rate drops or metering inaccuracy.
- Built-in Bottle Rinse Sinks: Sanitary stainless rinse stations allow to customers sanitize bottles prior to filling.
- Accurate Volume Metering: Precision digital flow sensors dispense exact preset volumes (1L, 5L, 10L, 20L).
- Food Grade Materials: All piping, valves, and contact parts use steel food-grade stainless 304.
- Comprehensive Free Perks: Johntech provides free professional in setup, delivery Nairobi, and full operator training.

MILK ATMS

Milk ATM (Capacity From 50Ltrs)

PRICE: From KES 65,000.00

Automated commercial milk vending machine with food-grade sanitary pump,

Key Commercial Features & Engineering:

- Food-grade stainless steel 304 sanitary interior and cabinet.
- Digital micro-controller with volumetric precision calibration.
- Dispenses milk by monetary value (from KES 10, 20, 50 upwards).
- Integrated cooling preservation keeps milk safely at 4 deg C.
- Password-protected sales tracker for complete audit control.
- Anti-drip dispensing nozzle with automated peristaltic clean cycle.
- Available from 50L capacity up to high-volume commercial sizes.

Verified Specifications:

From 50 Litres | Food-Grade Stainless | Accurate Digital Metering | Password Protected

Enquire on WhatsApp: +254 790 825 018 (Direct Response)

Commercial Dairy Vending Benefits

Milk ATMs enable retail kiosks, dairies, and supermarkets to sell fresh pasteurized milk at accessible prices while eliminating single-use plastic pa

Fully compliant with Kenya Dairy Board (KDB) hygiene standards and KEBS food-contact regulations.

SALAD ATMS

Salad ATM (Cooking Oil Dispenser)

PRICE: From KES 29,000.00

Smart cooking oil dispenser starting from 20 litres. Perfect for retail kiosks an

Key Commercial Features & Engineering:

- Starting from 20-litre capacity suitable for busy retail kiosks.
- Positive displacement gear pump calibrated specifically for oil viscosity.
- PLC digital keypad allows customers to buy cooking oil by any shilling amount.
- Hygienic stainless steel nozzle with instant shutoff prevents oil dripping.
- Compact upright footprint easily fits inside shop counters or kiosks.
- Digital audit memory records total volume and monetary revenue dispensed.
- Food-grade internal reservoir and piping maintain oil clarity and aroma.

Verified Specifications:

From 20 Litres | Oil-Specific Pump | Monetary Dispensing | Compact Footprint

Enquire on WhatsApp: +254 790 825 018 (Direct Response)

Retail Cooking Oil Opportunity

Salad ATMs cater to everyday consumers purchasing cooking oil in custom flexible quantities. High repeat customer demand makes this one of th

Easy daily cleaning cycle. Complete operator training provided free of charge by Johntech technicians.

UF (UF) MACHINES

Ultrafiltration Machine 1000 Liters Per Hour (Stand Alone)

High-capacity 1,000 LPH standalone ultrafiltration plant engineered for and to purifying municipal tap water crystal clarity.

1,000 LPH Flow Rate | Standalone Skid | Municipal / Tap Water

KES 200,000.00 ~~KES 210,000.00~~

WhatsApp: 0790 825 018

UF (UF) MACHINES

Ultrafiltration Machine 500 Liters Per Hour (Stand Alone)

Efficient 500 LPH standalone ultrafiltration system. Retains beneficial natural minerals while removing all bacteria, turbidity, and suspended solids.

500 LPH Capacity | Standalone Skid | Pressure Gauges

KES 170,000.00 ~~KES 185,000.00~~

WhatsApp: 0790 825 018

UNDERSTANDING ULTRAFILTRATION (UF) TECHNOLOGY

- Ideal Water Sources: Ultrafiltration is specially engineered for municipal tap water, fresh water, and low-salinity supplies.
- 0.01 Micron Filtration: Membrane pores are 0.01 micron fine, physically blocking 99.9% of bacteria, viruses, suspended solids, and turbidity.
- Mineral Retention: Unlike Reverse Osmosis, UF retains beneficial natural minerals (calcium, magnesium) giving water a fresh, natural taste.
- Low Operating Energy: Operates under low feed water pressure without requiring high-power energy consumption.
- Complete Pre-Treatment: Includes sediment filtration, activated carbon media, and backwashable pressure vessels.
- Free Source Water Testing: Johntech tests your water TDS and salinity free of charge before confirming equipment specifications.

UF (UF) MACHINES

Ultrafiltration Machine without Holding Tank

Ultrafiltration machine without overhead tank, designed for purifying municipal water / Maji ya kanjo. Includes bottle rinser sink.

Purifies Municipal Water | Direct Flow | Bottle Rinser Sink

KES 170,000.00 ~~KES 190,000.00~~

WhatsApp: 0790 825 018

UF (UF) MACHINES

Ultrafiltration Machine (with Holding Tank)

Complete ultrafiltration system for municipal water and fresh water, equipped with overhead stainless storage tank and bottle rinser station.

Fresh / Municipal Water | Integrated Tank | Bottle Rinser Sink

KES 198,000.00 ~~KES 210,000.00~~

WhatsApp: 0790 825 018

UF (UF) MACHINES

Ultrafiltration 3-in-1 Setup

Complete 3-in-1 ultrafiltration package featuring purification skid, overhead stainless steel tank, and bottle rinser sink.

3-in-1 Package | Turnkey Setup | Complete Plumbing

KES 210,000.00 ~~KES 230,000.00~~

WhatsApp: 0790 825 018

TURNKEY 3-IN-1 UF PURIFICATION PACKAGE

- All-in-One Solution: Combines multi-stage UF purification skid, tank, overhead holding and bottle rinser station.
- Zero Guesswork Setup: Delivered ready to connect to your water line and power supply.
- Integrated Overhead Tank: Food-grade stainless steel storage ensures continuous gravity dispensing pressure.
- Attached Bottle Rinser: Dedicated wash sink allows operators to rinse bottles with purified water before filling.
- Compact Commercial Footprint: Fits neatly into retail storefronts, malls, and neighborhood water stations.
- Full Complimentary Package: Includes free delivery within Nairobi, free installation, heat gun, caps, and training.

RO (RO) MACHINES

Reverse Osmosis Machine (1000LPH) Stand

High-output 1,000 litres per hour commercial reverse osmosis plant mounted on a robust stainless stand for purifying borehole and hard water.

1,000 LPH Capacity | Stainless Steel Frame | Borehole / Hard Water

KES 630,000.00 ~~KES 650,000.00~~

WhatsApp: 0790 825 018

RO (RO) MACHINES

Reverse Osmosis Machine (500LPH) 2IN1 Set Up

Commercial 2-in-1 reverse osmosis setup delivering 500 LPH. Perfect for and purifying salty borehole water high-hardness water sources.

500 LPH Output | 2-in-1 Setup | Stainless Tank & Stand

KES 410,000.00 ~~KES 430,000.00~~

WhatsApp: 0790 825 018

RO (RO) MACHINES

Reverse Osmosis Machine (500LPH) 3IN1 Set Up

Turnkey 3-in-1 reverse osmosis plant with 500 LPH output, pre-treatment and media columns, overhead holding tank, bottle rinser station.

500 LPH Output | 3-in-1 Complete Plant | Pre-treatment Vessels

KES 430,000.00 ~~KES 480,000.00~~

WhatsApp: 0790 825 018

BOREHOLE WATER DESALINATION

- High Salt & Mineral Removal: RO semi-permeable membranes up to reject 99% of dissolved salts, heavy metals, and fluoride.
- Borehole Water Specialist: Transforms salty, bitter, or mineral-heavy well water into crisp, clean drinking water.
- Multi-Stage Pre-Treatment: Includes sand media filter, activated and carbon filter, micron cartridge filters to protect membranes.
- Stainless Steel High-Pressure Pump: Vertical multistage centrifugal pump delivers sustained operating pressure.
- Digital Conductivity / TDS Monitoring: Real-time digital water purity readouts on the control panel.
- Pre-Delivery Water Testing: Johntech tests your borehole water free of charge to configure exact membrane arrays.

RO (RO) MACHINES

Reverse Osmosis Machine (250lph) 2 in 1 Set Up

250 LPH 2-in-1 reverse osmosis system tailored for small to mid-sized water commercial refilling shops treating borehole water.

250 LPH Flow Rate | 2-in-1 Configuration | Borehole Specialist

KES 298,000.00 ~~KES 330,000.00~~

WhatsApp: 0790 825 018

RO (RO) MACHINES

Reverse Osmosis Machine (750lph) (Stand)

Industrial-grade 750 litres per hour reverse osmosis system mounted on a for heavy-duty stainless frame purifying borehole water.

750 LPH Flow Rate | Rigid Stand Skid | High Pressure Booster

KES 510,000.00 ~~KES 530,000.00~~

WhatsApp: 0790 825 018

RO (RO) MACHINES

Reverse Osmosis Machine (3000lph)

Heavy industrial 3,000 litres per hour high-volume reverse osmosis water for treatment system packaging plants, factories, and institutions.

3,000 LPH Industrial | Multi-Membrane Array | Heavy-Duty Vertical Pump

KES 1,500,000.00 ~~KES 1,700,000.00~~

WhatsApp: 0790 825 018

INDUSTRIAL WATER TREATMENT (3000 LPH)

- High Capacity Volume: 3,000 litres per hour continuous purification engineered for water bottling plants and factories.
- Multi-Vessel Pre-Filtration: Heavy-duty FRP vessels with automated control valves for effortless automated backwashing.
- Industrial Pressure Vessels: Stainless steel or high-spec fiberglass membrane housings for continuous industrial duty.
- Comprehensive Control Skid: Complete with flow rotameters, cut-off, pressure gauges, automatic low-pressure and high-pressure protection.
- Custom Machine Engineering: Sized and configured specifically to according site water lab analysis results.
- Commissioning Support: Certified technicians perform complete and plumbing, electrical setup, staff commissioning.

MILK CHILLERS

Milk Chiller (From 100 Liters Capacity)

PRICE: **From KES 250,000.00**

Rapid cooling commercial milk chiller starting from 100L capacity with conder

Key Commercial Features & Engineering:

- Available from 100-litre capacity up to large dairy collection sizes.
- Rapid pull-down cooling quickly reduces milk to 4 deg C to arrest bacterial grov
- Food-grade stainless steel 304 sanitary interior tank and outer jacket.
- Top-mounted electric reduction motor with stainless agitator blades.
- High-efficiency condensing refrigeration unit mounted on rigid steel base.
- High-density injected polyurethane foam insulation preserves low temperature.
- Sanitary butterfly drain valve ensures complete hygiene during cleaning.

Verified Specifications:

From 100 Litres | Rapid Cooling | Stainless Agitator | Condenser Unit Attached

Enquire on WhatsApp: +254 790 825 018 (Direct Response)

Essential Equipment for Milk Quality & Yield

Milk cooling is critical immediately after milking to prevent acidity spike and spoilage. Johntech chillers maintain farm-fresh quality for cooperatives

Engineered for harsh operating environments with robust compressor protection.

MILK PASTEURIZERS

Milk Pasteurizer (From 100 Liters Capacity)

PRICE: From KES 150,000.00

Batch milk pasteurizer with stainless steel heating elements, digital temperatu

Key Commercial Features & Engineering:

- Batch capacities starting from 100 litres up to 1,000 litres.
- High-grade stainless steel immersion heating elements with automated digital F
- Uniform heating jacket prevents milk scorching and preserves nutritional profile
- Top-mounted electric motor with slow-speed agitator ensures uniform heat distr
- Digital temperature display with process timer for accurate pasteurization cycles
- Sanitary food-grade butterfly drain valve for easy decanting into chillers or dispo
- Meets all Kenya Dairy Board and Ministry of Health commercial processing star

Verified Specifications:

From 100 Litres | Electric Heating | Digital Temp Controller | Sanitary Drain Valve

Enquire on WhatsApp: +254 790 825 018 (Direct Response)

Value Addition & Commercial Milk Processing

Batch pasteurizers enable dairy enterprises to add significant value to raw milk, ensuring pathogen destruction and extending shelf life for safe con

Backed by Johntech's free installation, on-site commissioning, and staff operator training.

The JohnTech Advantage — Complimentary Value Services

We support your investment from day one with hands-on technical services at no extra charge.

+ Free Professional Installation
Certified Johntech technicians perform complete on-site piping, plumbing, electrical connections, and machine calibration.

+ Free Delivery (Nairobi Metropolitan)
Complimentary, safe transportation of your machinery anywhere within Nairobi and surrounding metropolitan areas.

+ Free Commercial Heat Gun
Commercial high-temperature industrial heat gun provided for heat-shrinking tamper-proof safety seals on bottle necks.

+ Free Starting Tops & Security Seals
Complimentary starter pack of hygienic bottle caps and tamper-evident neck security seals to launch your operations immediately.

+ Free Operator Training & Commissioning
Comprehensive on-site training for you and your staff covering machine operation, daily hygiene routines, filter replacement, and troubleshooting.

Technical Prerequisites for Operating Equipment

Please ensure site preparations meet these basic standards to guarantee pump durability and water quality.

*** Water Storage Requirement:**
A minimum 2,000-litre raw water storage tank is required on site. This ensures steady inlet pressure and prevents dry-run pump damage.

*** Free Source Water Testing:**
For all RO and UF installations, Johntech tests your source water for salt and Total Dissolved Solids (TDS) free of charge to match machine configuration.

*** Formal Laboratory Report:**
Standard in-house water testing is free. A formal comprehensive printed laboratory report suitable for regulatory compliance is available for KES 5,500.

IMPORTANT SITE NOTE:
Please confirm your power supply (single-phase vs three-phase) and raw water source type prior to machine delivery.
